What are the risks, and what are the benefits?". The main text reads: "In this two-part series, Madison Corney provides the history of Yucca Mountain from 1987 to the present -- and whether or not Yucca Mountain would be good for the state of Nevada. Cassie Wilson explains why nuclear power is good -- because of the benefits it provides to the climate by being emission-free -- but can be horrible for the environment if radioactivity leaks into the water table." Below the text is a call to action: "Join us Monday at 5 and 6 p.m. for the full story." and a link: "Have questions or comments? Connect with Madison and Cassie on Facebook".

At the bottom right, there is another advertisement for "Police: 71 arrested during Saturday night's anti-Trump protest in Portland" and "Two men in custody in connection to armed robbery at Carson business".
